"As a female career Naval Officer, my hair was severely damaged due to medication and alopecia. The service for women at the VAMC through the Prosthetic Department has given me hope and has uplifted my self-confidence. My new Cranial Prosthesis wig increased my personal initiative as a woman, veteran, mother, and overall person. My hair loss contributed to my depression, but now my hair has given me the confidence and daily motivation to get up and shout a new song. I feel healthy, beautiful, and not broken! Thank you Wigs Plus LLC, VAMC, and the broken! Thank you Wigs Plus LLC, VAMC and the Women's Clinic."

"As a Doctor, I have witnessed the devastation that Hair loss causes, such as embarrassment, anger, shame, depression, or numerous other emotions. Many times, female veterans have been told that there is nothing that can be done for their hair loss, or have had to endure invasive treatments which may not be helpful, only offering temporary relief if any. This can leave a woman feeling hopeless and without help. Wigs Plus provides that help.

This is what has impressed me in working with Wigs Plus. Each patient that has been referred to them has been treated exceptionally; they feel like part of a family, and most of all, feel a greater sense of confidence beauty, and self-worth after being serviced. Thanks again for partnering with us to serve those that have served our great nation."
